Cumulative Author Index, Volume VIII, JBC&R

A

Achauer, Bruce M., MD, 61–66; 135–137; 238–239; 330–332; 427–428; 531–535; 561
Ahrenholz, David H., MD, 496–502
Alexander, J. Wesley, MD, ScD, 9–14; 206–209; 363–365; 371–375
Allo, Maria, MD, 376–380
Alter, Beth Ziegler, OTR/L, 138–140
Amin, Mudher A., FRCS, 15–18
Anderson, J., PhD, 294–298
Apfel, Lois M., OTR, 97–102; 140–143
Asko-Seljavaara, Sirpa, MD, 492–495
Ayvazian, Vatche H., MD, 571

B

Baker, Christopher C., MD, 503–508
Bale, J. F., MD, 543–545
Barnett, P. H., LPT, 322–324
Bartle, Edward J., MD, 111–114; 391–394
Baxter, Charles R., MD, 32–55; 189–191
Beattie, Diana M., CTRS, 340
Beckmeyer, Deborah, MA, CTRS, 339–340
Berg, Rodney, PhD, 475–482
Berry, Charles, PhD, 260–262; 294–298
Bingham, H., MD, 216–219
Black, Kirby S., PE, 531–535
Blades, B. C., MSW, 292–293
Boertman, Jane, BS, 381–383
Boltwood, Michael D., MSW, 263–268; 274–279
Book, Linda K., RN, 571
Boswick, John A., Jr., MD, 46–48
Bowens, B., MN, 124–125
Brack, Gregory, MS, MSES, 299–306
Brezel, Bruce S., MD, 132–134
Brones, Michael F., MD, 286–291
Brown, Barbara, RN, MScN, 280–285
Browne, Gina, RN, PhD, 280–285
Bryne, Carolyn, RN, MHSc, 280–285
Buschbacher, Lois P., MS, 579–584

C

Campbell, Judith L., MD, 299–306
Carroll, Wendy, RN, 199–205
Castenholz, R., MD, 216–219
Chang, Dillon E., MD, 228–232
Chau, Long C., 531–535
Cheng, Hsu-Hsi, MD, 111–114
Cochrane, Charles G., MD, 536–542
Covey, Mark H., OTR, 224–226; 274–279
Cram, Albert E., MD, 220–223

D

Darko, D. F., MD, 294–298
Dawson, L., RN, 19–22
Deitch, Edwin A., MD, 475–482
Demling, Robert, MD, 269–273
Desai, Manubhai H., MD, FRCS, FACS, 210–212; 406–409
Dimick, Alan R., MD, 28–31; 124–125; 155–156; 199–205; 240–241; 341–342; 574–578; 587–588
Dobke, Marek K., MD, PhD, 189–191; 554–557
Dominic, William J., MD, 395–397; 435–436
Drews, Judith E., PhD, PT, 28–31
Dutcher, Kristi, RPT, 224–226; 274–279

E

Edlich, Richard F., MD, PhD, 150–154; 227–232; 333–335; 418–425; 579; 580–584
Elias, R. M., MD, 469–474
Engrav, Loren H., MD, 224–226; 398–402; 403–405

F

Faist, Eugen, MD, 503–508
Fakhri, Omar, MSc, PhD, MRC Path, 15–18
Fang, Chenghui, MD, 206–209
Feller, Irving, MD, FACS, 384–386
Field, Thomas O. Jr., MD, 395–397; 509–512
Figge, Helen, RPh, 269–273
Finley, Robert K. Jr., MD, FACS, 138–140; 144–145; 573
Finn, M. C., MD, 126–131
Frank, David H., MD, 97–102
Frank, Hugh A., MD, 97–102; 260–262; 294–298

G

Gadd, Michelle A., MD, 509–512
Galanos, Anthony N., MD, 115–116
Gary, L. B., MA, 195–198
Gillespie, Robert, MD, 199–205; 220–223
Gilstrop, H., RN, MEd, 117–123
Goede, Myron, MS, 366–370
Goitz, Robert J., MS, 580–584
Goldfarb, I. William, MD, 23–24; 566–568
Goldring, A. M., RN, 19–22
Goldsand, G., MD, 19–22
Gonce, Sara J., BA, BS, 9–14
Gonzales, Evelyn L., CNS, MSN, RN, 25–27
Gordon, Mary D., RN, MS, 67–71; 146–154; 233–237; 336–340; 429–433; 569
Gottlieb, Jourdan R., MD, 398–402
Green, A., MD, 294–298
Green, Douglas R., PhD, 521–526
Gross, J. D., LPT, 322–324
Grossman, A. Richard, MD, 286–291
Grube, Baiba J., MD, 403–405

H

Habal, Mutaz B., MD, FRCS(C), FACS, 213–215
Hagemann, Jane M., BS, RN, 333–335

Haith, Linwood, MD, 199–205
Hall, J. W. III, PhD, 195–198
Hallberg, Patricia, RN, BSN, 220–223
Hallock, Geoffrey G., MD, FACS, 387–390
Hammond, Jeffrey S., MD, 330–332; 410–411; 572
Hansbrough, John F., MD, 97–102; 395–397; 509–512
Harnar, Timothy J., MD, 554–557
Hartford, Charles E., MD, 49–53
Hartigan, Carol, MD, 150–154; 228–232
Hasslen, Sharon R., BS, 496–502
Hayashi, A., MD, 469–474
Hayes, Edward C., PhD, 189–191
Heggers, J. P., PhD, 192–194; 381–383
Heimbach, David M., MD, 199–205; 224–226; 274–279; 398–402; 403–405
Helmer, F. T., PhD, 117–123
Helvig, Beth, RN, MS, 236–237
Henson, Laura E., BS, 531–535
Hernandez, Pedro, MD, 23–24
Herndon, David N., MD, FACS, 195–198; 210–212; 406–409
Hewitt, Charles W., MS, 531–535
Hickman, Christie, 330–332
Hondorp, Mallory, RN, 148–149
Hoyt, David B., MD, 527–530; 549–553
Huang, Virginia, MD, 269–273
Hunter, Frank P. Jr., 150–154
Hupp, Saunders L., MD, 115–116
Hyslop, Paul A., PhD, 536–542

J

Jackson, Janis, MD, 536–542
Johnson, Carole L., RPT, 56–60; 138–145; 224–226; 325–329; 414–417; 573
Johnson, Ralph W., BA, 260–262
Johnston, M. G., PhD, 469–474
Jones, Larry M., MD, 138–140; 144–145; 573
Jones, Richard, MD, 406–409
Jordan, Bryan S., CPT, ANC, 237

K

Kealey, G. Patrick, MD, 220–223; 543–545
Kibbee, Ellen, RN, BSN, CCRN, 199–205; 220–223
Kimball, Kathryn L., BS, PT, 28–31
Kirby, R., MD, 216–219
Kishman, Mary, RN, 569–570
Klauber, M., PhD, 294–298
Kupper, Thomas S., MD, 503–508

L

LaClave, Linda J., PhD, 299–306
deLateur, Barbara, MD, 224–226; 274–279
Law, Edward J., MD, 53–55
Lee, Jennifer, RN, MSN, 316–317
Loeser, John, MD, 309–312
Love, Barbara, RN, MHSc, 280–285
Luterman, Arnold, MD, 115–116; 316–316

M

MacMillan, Bruce G., MD, 206–209
Maley, Matthew P., MS, CEE, 62–65; 135–137; 238–239
Maniker, A. A., MD, 192–194
Martyn, J. A. Jeevendra, MD, 146–148
Marvin, Janet A., RN, MSN, 35–38; 71; 224–226; 274–279; 307–309; 312–313; 313–314; 398–402
Massanari, R. M., MD, 543–545
Mayes, A., BSN, 124–125
McDonald, Iris, RN, MS, CCRN, 233–234
McGeever, Kevin E., MD, 132–134
McHugh, Thomas P., MD, 381–383
McManus, William F., MD, 32–34; 237
Meyer, D. O., LPT, 322–324
Mieszala, Patricia, RN, 562–565
Millard, Steven P., PhD, 398–402
Miller, Sidney F., MD, FACS, 138–140; 144–145; 412–413; 573; 585–586
Miskell, Philip, BA, BS, 9–14
Mlcak, Ron, RRT, 236–237
Monafo, William W. Jr., MD, 32–55
Moran, Kevin T., MD, 376–380
Morgan, Raymond F., MD, 150–154; 333–335; 580–584
Moss, R. L., MD, 294–298
Moylan, Joseph A., MD, 255–259
Mullett, T., MS, 216–219
Munster, Andrew M., MD, 292–293; 376–380

Questad, Kent A., PhD, 263–268; 274–279

R

Rees, Joseph M., 155–156; 240–241; 341–342; 435–436; 587–588
Revak, Susan D., BA, 536–542
Richard, Reginald L., PT, MS, 138–140; 144–145; 573
Rieg, L. MSN, MBA, 117–123
Robb, Edward C., BS, MBA, 206–209; 371–375
Roberts, Brian B., BA, 111–114; 391–394
Roberts, Jackie, RN, MHSc, 280–285
Robertson, G. A., MD, 19–22
Robson, Martin C., MD, 192–194; 381–383
Rodgers, Cindy, RN, 70–71
Ronald, A. R., MD, 19–22
Rosenstein, Debra Leigh Walls, EdD, 319–322; 337–339

S

Sachs, R. J., MS, 192–194
Sadowski, Denise A., RN, MSN, 569–570
Sams, M. Jr., MD, 124–125
Sandidge, Charles, RN, MSN, 314–315
Saydjari, Razi, MD, 406–409
Schane, Jane, BS, RD, 366–370
Schileru, Rodica, MD, 381–383
Schraufstätter, Ingrid U., MD, 536–542
Schreckenhofer, Charlotte, RRT, 234–235
Schubert, Dawn, RPT, 56–60
Schulte, Joyce, RN, 235–236
Shelby, J., 546–548
Shotwell, Richard E., 150–154
Sich, J. J., PhD, 513–520
Silverstein, Paul, MD, FACS, 366–370
Simoni, Jan, DVM, 554–557
Slater, Harvey, MD, 23–24; 566–568
Slater, Susan J., BA, 566–568
Smith, C. J., PhD, 126–131
Smith, D. J. Jr., MD, 192–194
Smith, David, MD, 199–205
Smith, J. C., MS, 126–131
Smith, Joseph F., MD, 228–232
Snelling, C. F. T., MD, 19–22
Soderberg, C., BS, 509–512
Solem, Lynn D., MD, 572
Spinella, Judy, RN, MS, 148–149
Stein, John M., MD, FACS, 132–134
Stinnett, J. D., PhD, 513–520
Stiver, H. G., MD, 19–22
Strauss, R. G., MD, 543–545

T

Tafel, John A., MD, 333–335
Tempereau, Clinton E., MD, 286–291
Thacker, John G., PhD, 150–154; 333–335; 580–584
Thompson, Rosemarie, RN, BSN, 66; 136–137
Thomson, D. A., MD, PhD, 483–487
Thomson, Philip D., PhD, 384–386
Thupari, Jagat, MD, 376–380
Towler, Michael A., MS, 580–584
Twomey, John A., MD, 558–560
Tudahl, L. A., RN, 292–293

V

Varas, Robin, RN, 68–70; 572
Velanovich, Vic, MD, 381–383

W

Wachtel, Thomas L., MD, 97–102; 140–143; 260–262; 294–298
Walker, Stanley, LPTA, 28–31
Walkinshaw, Marcus D., MD, 398–402
Walter, Pamela, RN, BSN, 70–71
Wang, Nandi, MD, 521–526
Wang, Xi-Zhen, MD, 111–114
Wang, Xue-Wei, MD, 111–114; 391–394
Ward, C. Gillon, MD, 43–46; 330–332; 410–411; 488–491
Ward, H. W., MD, 294–298
Warden, Glenn D., MD, 234–235; 371–375
Waymack, J. Paul, MD, 9–14; 363–365; 371–375
Wilder, Robert P., BS, 580–584
Williams, Joan S., MAT, 562–565
Winchurch, Richard A., PhD, 376–380
Winkler, J., BSN, MA, 117–123
Winkler, J. B., RN, MA, 195–198
Wu, Wen-An, MD, 111–114

X

Xing-Tao, Niu, MD, 381–383

Y

Yamada, Alan H., MD, 503–508
York, Gloria, RN, 572
Yurt, Roger W., MD, 48–49

Z

Zachary, J. S., MD, 192–194
Zheng, Huguang, MD, 521–526
Zoeller, T., MD, 216–219
Zoellner, Steven M., MD, 381–383
Zuker, R. M., MD, FRCS(C), FACS, 103–106

Cumulative Subject/Title Index, Volume VIII, JBC&R

1.0 Anesthesia
Anesthesia and the immune system, 483–487

2.0 Antiinfectives

3.0 Antimicrobial
Ceftazidime therapy versus aminoglycoside therapy in patients with Gram-negative burn wound infections, 19–22
In vivo comparison of two silver sulfadiazine antimicrobial agents on burn wound infection, 381–383

4.0 Biologic Dressings
A prospective controlled trial of Biobrane versus scarlet red on skin graft donor areas, 384–386
Prospective clinical study of hydron, a synthetic dressing, in delivery of an antimicrobial drug to second-degree burns, 206–209

5.0 Body Systems Alterations
Auditory brainstem response in auditory assessment of acute severely burned children, 195–198

6.0 Burn Shock
Biochemical events associated with pulmonary failure in shock and trauma, 536–542
Role of the lymphatic circulatory system in shock, 469–474

7.0 Burn Team

8.0 Burn Wounds, Closure, Coverage
A simple moisture chamber for the early treatment of corneal exposure in patients with facial burns, 115–116
Leukotrienes LTB_4 and LTC_4 in thermally injured patients' plasma and burn blister fluid, 189–191
Neomycin sulfate dressing for meshed split-thickness skin grafts, 23–24
The effect of low-voltage electric therapy on the healing of resistant skin burns, 15–18

9.0 Chemical Burns
Sulfuric acid burns in a child: Histologic examination as an indicator of wound depth, 395–397
Partial excision of residual burn lesions, 398–402
Molten metal burns to the lower extremity, 403–405

10.0 Clinical Management
Burns of the feet, 192–194

11.0 Debridement

12.0 Devices
Controlled air suspension: An advantage in burn care, 558–560

13.0 Economics
Development of a patient classification system for burn units—A case study, 117–123
Legislative process erodes values as it relates to health care delivery, 341–342
Will burn center hospitals survive PPS?, 155–156
Will burn centers survive another round of budget cuts?, 240–241

14.0 Education
Diagnosis-related groupings (DRGs) and wound closure: Roundtable discussion, 199–205
The burn journal club: An effective multidisciplinary learning tool, 410–411

15.0 Electrical Burns

16.0 Emergency Care

17.0 Endocrinology

18.0 Epidemiology
The impact of thermal injury, 260–262

19.0 Etiologic Agents
Fatal hydrofluoric acid cutaneous exposure with refractory ventricular fibrillation, 216–219
The price of a beautiful tan: A case report, 124–125

20.0 Excision/Grafting

21.0 Hematology
Granulocyte kinetics in burns, 492–495
Mechanisms of loss of human neutrophil chemotaxis following thermal injury, 496–502
Trauma, sepsis, and the immune response, 460–468

22.0 Infection
Bacterial translocation from the gut: A mechanism of infection, 475–482
Corneal perforations caused by multiple resistant *Pseudomonas* organisms: A case report, 406–409
Cytomegalovirus infection in burn patients, 543–545
Iron and immunologic function, 488–491
Patterns of infection over the past ten years (from the Marion Labs roundtable discussion on infection, February 1985), 32–55
Toxic epidermal necrolysis complicated by severe wound sepsis: A case study, 554–557

23.0 Immunology
A suppressor-inducer factor produced by burn trauma-associated T cells, 521–526
Cyclosporine-induced long-term allograft survival and its potential in posttrauma tissue replacement, 531–535
Effect of two new immunomodulators on normal and burn injury neutrophils and macrophages, 9–14
Generation and activity of suppressor peptides following traumatic injury, 527–530
Immune response modulation after burn injury: T cells and antibodies, 509–512

Immunologic monitoring of infection risk in trauma patients: Research questions and an approach to the problem, 549–553
Immunomodulators for the prevention of infections in burned guinea pigs, 363–365
Interleukin-1 and T cell function following injury, 503–508
Modulation of human neutrophil function by the endogenous opiate enkephalins, 513–520
Prophylactic intravenous immunoglobulin replacement in high-risk burn patients, 376–380
The possible role of mast cells (allergy) in the production of keloid and hypertrophic scarring, 126–131
Toxic epidermal necrolysis complicated by severe wound sepsis: A case study, 554–557
Transfusion-induced immunosuppression, 546–548

24.0 Nursing
A school reentry program for burned children Part I: Development and implementation of a school reentry program, 319–322
A school reentry program for burned children Part II: Physical therapy contribution to an existing school reentry program, 322–324
A survey of attitudes of burn unit nurses, 299–306
Anchoring endotracheal tubes on patients with facial burns, 233–237
"Borrowed" burn nurses: A cost-effective option for providing skilled staff during periods of need, 220–223
Burn clinical nurse specialist/nurse clinician roles and role development, 25–27
Infection control in the burn unit, 67–71
Pediatric recreational therapy after thermal injury, 336–340

25.0 Nutrition
Comparison of energy expenditure measurement techniques in severely burned patients, 366–370

26.0 Pain
Hypnotherapy as a treatment for pain in patients with burns: Research and clinical considerations, 263–268
Pain management in the burn patient: Excerpts from a symposium on pain management at Harborview Hospital, Seattle, Washington, July 23, 1986, 307–318
Use of TENS for pain reduction in burn patients receiving Travase, 28–31

27.0 Pediatrics

28.0 Pharmacology
Haloperidol complications in burn patients, 269–273
Ketamine pharmacology and therapeutics, 146–148

29.0 Post Mortem Exam

30.0 Prevention
Burned children: A socioeconomic profile for focused prevention programs, 566–568
Burns In school-age children: Demographics and burn prevention, 330–332
Children should be seen—Not hurt, 135–137
How burn aware are you?, 136–137
Prevention of tap water scald burns, 61–65
Project L.I.F.E.: Local Involvement in Fire Education, 562–565
Technical resource: A possible answer?, 238–239

31.0 Psychiatry
Prevalence of postburn depression following burn injury, 294–298

32.0 Psychology
Adult psychosocial adjustment following childhood injury: The effect of disfigurement, 280–285
Patient self-reports three months after sustaining a major burn, 274–279
Psychological regression and marital status: Determinants in psychiatric management of burn victims, 286–291
Sexual satisfaction in burn patients, 292–293

33.0 Psychosocial Aspects

34.0 Reconstruction
Early vascular grafting to prevent upper extremity necrosis after electric burns: Additional commentary on indications for surgery, 391–394
Free skin flap transfer in repairing deep electrical burns, 111–114
The parascapular fasciocutaneous flap for release of the axillary burn contracture, 387–390
The use of tissue expansion in burn scar reconstruction, 107–110
The use of tissue expansion in pediatric scalp burn reconstruction, 103–106

35.0 Rehabilitation
Bio-Concepts, 325–329
Elevated/window splint for the burned lower extremity, 138–140
Ergonomics of support cane handles, 150–154
Follow-up report on burned hands, treatment plans, 213–215
Functional electrical stimulation in intrinsic/extrinsic imbalanced burned hands, 97–102
Halo neck splint, 140–143
Home exercise kit for the shoulder, 144–145
Influence of gender and age on the behind-the-back reach test, 228–232
Mechanical performance of exertubing for isotonic hand exercise, 333–335
Physical therapists care for wounds, 56–60
Return of hand function following major burns, 224–226
